VOLUME CONTENTS

Volume 54 (1988)

REVIEW

Interorganellar sequence transfer: plant mitochondrial DNA is nuclear, is plastid, is mitochondrial
by W. Schuster and A. Brennicke (Tübingen, F.R.G.) 1–10

PHYSIOLOGY AND BIOCHEMISTRY

Photosynthesis and respiration in air-grown and CO_2-grown photoautotropic cell suspension cultures of carnation
by F. Rebeille (Saint Paul Lez Durance, France) 11–21

Interaction between cortical cylinder and epidermis during auxin-mediated growth in pea internodes
by U. Kutschera and W.R. Briggs (Stanford, CA) 23–28

Induction of two alcohol dehydrogenase polypeptides in rice roots during anaerobiosis
by K.-I. Kadowaki, M. Matsuoka, N. Murai and K. Harada (Yatabe, Japan) 29–36

Kinetics of proton secretion and growth in maize roots: action of various plant growth effectors
by H. Lüthen and M. Böttger (Hamburg, F.R.G.) 37–43

GENETICS AND MOLECULAR BIOLOGY

Jerusalem artichoke invertases — immunocharacterization of a soluble form and its putative precursor
by P. Goupil, Y. Croisille, F. Croisille and G. Ledoigt (Aubière, France) 45–54

CELL AND TISSUE STUDIES IN VITRO

Glyphosphate-tolerance in *Catharanthus roseus*
by R.C. Cresswell, M.W. Fowler and A.H. Scragg (Sheffield, U.K.) 55–63

In vitro plant regeneration from cotyledon fragments of the olive tree (*Olea europaea* L.)
by L.A. Cañas and A. Benbadis (Paris, France) 65–74

Ethylene generation and reversal of ethylene effects during development in vitro of rapid-cycling *Brassica campestris* L.
by Z. Lentini, H. Mussell, M.A. Mutschler and E.D. Earle (Ithaca, NY) 75–81

Selection of lactose-adapted cells in *Vinca minor* and *Datura innoxia* cultures: location and characterization of β-galactosidase and lactase activities
by O.C. Elavummoottil, S. Duret, A. Vannereau, L. Cosson and J.C. Mestre (Châtenay-Malabry, France) 83–91

PHYSIOLOGY AND BIOCHEMISTRY

Oleoyl-phosphatidylcholine molecular species desaturated in pea leaf microsomes — possible substrates of oleate-desaturase in other green leaves
by H. Serghini-Caid, C. Demandre, A.-M. Justin and P. Mazliak (Paris, France) 93–101

Separation of membrane vesicles from maize roots having different calcium transport activities
by G. Zocchi (Milano, Italy) 103–107

Interactions between ellipticine derivatives and the mitochondrial respiratory chain
by J. Dupont, G. Dodin and M.-A. Schwaller (Paris and Villejuif, France) 109–115

Effect of Mg^{2+}, Triton X-100 and temperature on basal and FC-stimulated plasma membrane ATPase activity
by M.I. De Michelis, C. Olivari, M.C. Pugliarello and F. Rasi-Caldogno (Torino and Milano, Italy) 117–124

Perturbation of alkaloid production by cadaverine in hairy root cultures of *Nicotiana rustica*
by N.J. Walton, R.J. Robins and M.J.C. Rhodes (Norwich, U.K.) 125–131

The interaction of senescence and wounding in oat leaves. II. Chlorophyll breakdown caused by wounding in light
by G. Giridhar and K.V. Thimann (Santa Cruz, CA) 133–139

Inhibition of nitrate reductase induction in germinating barley embryos by endosperm
by A.K. Gupta, A.K. Sharma, S. Guha-Mukherjee and S.K. Sopory (New Dehli, India) 141–145

CELL AND TISSUE STUDIES IN VITRO

Callus formation and plant regeneration capacity of apple embryonic axes and cotyledons in relation to seed dormancy
by I. Sińska (Warsaw, Poland) 147–152

Stimulation of growth in *Daucus carota* L. cell cultures by brassinosteroid
by D. Bellincampi and G. Morpurgo (Rome, Italy) 153–156

Characterization of a temperature-sensitive carrot cell mutant impaired in somatic embryogenesis
by F. Lo Schiavo, G. Guiliano and Z.R. Sung (Napoli, Italy and Berkeley, CA) 157–164

Electroporation-mediated improvement of plant regeneration from Colt cherry (*Prunun avium* × *Pseudocerasus*) protoplasts
by S.J. Ochatt, P.K. Chand, E.L. Rech, M.R. Davey and J.B. Power (Nottingham, U.K.) 165–169

PHYSIOLOGY AND BIOCHEMISTRY

Induction of the defense-related glucanohydrolases, β-1,3-glucanase and chitinase, by tobacco mosaic virus infection of tobacco leaves
by R. Vögeli-Lange, A. Hansen-Gehri, T. Boller and F. Meins, Jr. (Basel, Switzerland) 171–176

Active vanadate-sensitive H^+ translocation in corn roots membrane vesicles and proteoliposomes
by F. St. Marty-Fleurence, I. Bourdil, M. Rossignol and J.-P. Blein, (Dijon, France) 177–184

A re-examination of 5-aminolevulinic acid synthesis by isolated, intact, developing chloroplasts: the O_2 requirement in the light
by L. Huang and P.A. Castelfranco, (Davis, CA) 185–192

Decay of cytochromes and appearance of a cyanide-insensitive electron transfer pathway in *Euglena gracilis* grown in anoxia
by I. Carre, J.-L. Bomsel and R. Calvayrac (Paris, France) 193–202

Elicitor-induced accumulation of glyceollin and callose in soybean roots and localized resistance against *Phytopthora megasperma* f. sp. *glycinea*
by A. Bonhoff and H. Grisebach (Freiburg, FRG) 203–209

GENETICS AND MOLECULAR BIOLOGY

Genomic organization of the 28 kDa glutelin-2 gene from maize
by D. Gallardo, M. Reina, J. Rigua, A. Boronat and J. Palau (Barcelona, Spain) 211–218

CELL AND TISSUE STUDIES IN VITRO

Nitrous oxide as a possible alternative agent for chromosome doubling of wheat haploids
by F.L. Hansen, S.B. Andersen, I.K. Due and A. Olesen (Frederiksberg, Denmark) 219–222

Effect of temperature on growth of *Vicia faba* cotyledons in vitro
by H.M. Dekhuijzen, J. van Hattum and D.R. Verkerke (Wageningen, The Netherlands) 223–229

Plant regeneration from leaf callus protoplasts of *Actinidia chinensis* Planch. var. chinensis
by C.-K. Tsai (Cai Qi-Gui) (Beijing, China) 231–235

GENERAL

The phytotoxic ophiobolins produced by *Drechslera oryzae*, their structures and biological activity on rice
by C.-H. Yun, F. Sugawara and G.A. Strobel (Bozeman, MT) 237–243

Abscisic acid enhancement of lipid besicle aggregation
by B. Brengle, S.R. Wassall and W. Stillwell (Indianapolis, IN) 245–249

Subject Index Volume 54 251–253

Author Index Volume 54 255–256

Contents Volume 54 257–258
